

IRON ORE

Hiring Caracle Creek as your iron-ore exploration partner makes good business sense. We have deep experience in iron ore exploration. From target evaluation to project management, we understand the geology, the industry, and what you need to take your project to the next level.

When you work with Caracle Creek, you work with the best

We have close working relationships with leading iron-ore drilling specialists including environmental companies, drilling companies, surveyors, process engineers, mining engineers, mining contractors and accredited laboratories.

Working with Caracle Creek will save you time and money, and give you peace of mind because you're working with iron ore specialists.

Innovation at its finest

We have the in-house technical capabilities to drive your project from early exploration through to extraction, and we're committed to innovation.

Our team uses Geosoft Target to update drilling programs, plan maps, cross-sections, graphic borehole logs, grids and contours.

We rely on SABLE and Access database software to store and validate borehole and project data. Our top notch geological modelling and resource estimation expertise comes from Datamine and GEMS.

This means you get the best data possible, delivered by skilled project managers who understand the iron ore space as well as you do.

About Caracle Creek

Caracle Creek's integrated approach to geophysical and geological services means you get the info you need to make the right decisions, at a fraction of the cost.

No more hiring separate consultants for different stages of your project. Our team is innovative and agile, just like you, and our geologists, geophysicists and engineers work together to make your project successful.

Whether you engage us to manage your entire project or to simply execute a few surveys, working with Caracle Creek is the right decision.

We have offices in Canada, South Africa and the Dominican Republic ready to serve you.
